About:

LongLifePrinters.com is the website of a premier Hewlett Packard Printer Repair Shop named LongLife Electronics. Dave Longmore is the owner and lead technician. He's had a repair shop in Draper, Utah since 2006. Yes, the company name is a play on his last name & quality service is his game!

Dave Longmore has over 13 years of printer repair experience and serviced over 11,000 printers since 1996. After getting an AAS degree in Computer / Electronics & working for a Hewlett Packard Warranty Center for 4 years, Dave opened his own repair shop in May, 2000 in Fresno, California. He sold his business and moved his wife and three children to Utah to be closer to relatives. He started his business from scratch and has been satisfying his clients ever since.

Dave prides himself on his quality repairs that last and his meticulous and thorough cleaning. A motto of "No gouging the customer allowed" has built client trust from the beginning. His customer base continues to grow from a Children's Hospital with over 600 printers to the neighbor down the street with a single inkjet printer.

During the last year LongLife Electronics has added to their services; installing networks and CAT5/CAT3/T1 computer & phone cabling.

Over 95% of LongLife's repairs are "ON SITE". From Ogden, Utah along the Wasatch Front and south to Provo, Utah. Won't you give us opportunity to earn your business?
